

FURKAN ÇİTİL

AI Enthusiast
Munich, Germany, 81249
furkan.citil@tum.de

EDUCATION

Technical University of Munich
Master of Science
Communications and Electronics Engineering

October 2025 - Expected June 2027

Middle East Technical University
Bachelor of Science
Electrical and Electronics Engineering

October 2019 - June 2024
Overall GPA: 3.23/4

LANGUAGES

Turkish Native
English Fluent

EXPERIENCE

Rohde&Schwarz
Working Student(AI Research and Infrastructure Support)

Dec 2025 - Present

- Developing an internal LLM-based knowledge system
- Building RAG pipelines and data processing workflows for AI agents

ASELSAN
System Engineer

July 2024 - Oct 2025

- Developed real-time detection and tracking algorithms for EO/IR and UV systems, covering geometric/radiometric camera calibration, classification, and multisensor integration
- Built simulation tools and environments for software/hardware in the loop testing, enabling comprehensive validation of system functionalities under controlled and realistic conditions
- Created an automated test system that identifies and applies optimal configuration parameters, streamlining system performance optimization, and supporting efficient development cycles
- Ensured robust performance through end-to-end algorithm design and system-level coordination with other shareholders

Databoss Security & Analytics
Computer Vision and Machine Learning Engineer

March 2024 - July 2024

- Conducted research on SOTA blind super-resolution algorithms
- Developed and implemented algorithms for remote-sensing applications

METU OGAM (METU Center for Image Analysis)
Undergraduate Researcher

Jan 2023 - June 2024

- Researched on event based vision under the supervision of [Aydm Alatan](#)
- Worked on the fusion of event vision sensors and depth cameras for visual navigation

Micropsi Industries

July 2023 - Sept 2023

Robotics Software Engineering Internship

- Worked on software integration of Fanuc robots to the company's existing system MIRAI in infrastructure and robotics teams
- Researched and implemented algorithms for the new feature releases

Kuartis Technology and Consulting

July 2022 - Sept 2022

Computer Vision and Machine Learning Engineering Internship

- Built camera calibration pipeline for a MWIR camera
- Researched and implemented convex optimization algorithms for high speed applications
- Implemented numerical methods for computer vision algorithms to run on FPGAs

SensHero Predictive Maintenance Solutions

Agu 2021 - Oct 2021

Data Science Internship

- Contributed to a project about fault detection in electric transmission lines
- Built models for condition monitoring and predictive maintenance

EXTRA-CURRICULAR

First Place in UORG 2023 Target Tracking (Image Processing and Control)

First Place in UORG 2022 Autonomous UAV Computer Vision Category (Image Processing)

Third Place in UORG 2022 Autonomous UAV Autopilot Category (Algorithm Development)

Second Place in METU VTOL 2020 Sponsored by Boeing (Image Processing and Design)

First Place in International Robot Competition 2020 (Image Processing and Team Presenter)

11th Place in Swarm UAV Competition - TEKNOFEST 2020 (Path Planning)

Google Solution Challenge 2021 (Mobile App Development with Flutter)

AdimODTÜ Undergraduate Research Grant Program in 2020-2022

DTS2022 Course as a part of Design Factory Global Network (Interdisciplinary Course in METU)

Deep Learning Study Group # 7 with Inzva (a Turkish Hacker Community)

Mentorship in the IEEE METU, Specifically Robotic and Automation Society (RAS) subdivision

TECHNICAL STRENGTHS

Computer Languages Python, C/C++, MATLAB, Dart

Software & Tools Pytorch, ROS, OpenCV, L^AT_EX, Git, Flutter, Gazebo, Solidworks
