

FURKAN ÇİTİL

AI Enthusiast
Munich, Germany, 81249
furkan.citil@tum.de

EDUCATION

Technical University of Munich
Master of Science
Communications and Electronics Engineering

October 2025 - Expected June 2027

Middle East Technical University
Bachelor of Science
Electrical and Electronics Engineering

October 2019 - June 2024
Overall GPA: 3.23/4

LANGUAGES

Turkish Native
English Fluent (*IELTS Overall Band Score : 7*)
Spanish Beginner

EXPERIENCE

ASELSAN

July 2024 - Oct 2025

System Engineer

- Developed real-time detection and tracking algorithms for EO/IR and UV systems, covering geometric/radiometric camera calibration, classification, and multisensor integration.
- Built simulation tools and environments for software-in-the-loop (SIL) and hardware-in-the-loop (HIL) testing, enabling comprehensive validation of system functionalities under controlled and realistic conditions.
- Created an automated test system that identifies and applies optimal configuration parameters, streamlining system performance optimization, and supporting efficient development cycles.
- Ensured robust performance through end-to-end algorithm design and system-level coordination with other shareholders.

Databoss Security & Analytics

March 2024 - July 2024

Computer Vision and Machine Learning Engineer

- Conducted research on SOTA blind super-resolution algorithms
- Developed and implemented algorithms for remote-sensing applications

METU OGAM (METU Center for Image Analysis)

Jan 2023 - June 2024

Undergraduate Researcher

- Researched on event based vision under the supervision of [Aydm Alatan](#)
- Worked on the fusion of event vision sensors and depth cameras for visual navigation

Micropsi Industries

July 2023 - Sept 2023

Robotics Software Engineering Internship

- Worked on software integration of Fanuc robots to the company's existing system MIRAI in infrastructure and robotics teams
- Researched and implemented algorithms for the new feature releases

Kuartis Technology and Consulting

July 2022 - Sept 2022

Computer Vision and Machine Learning Engineering Internship

- Built camera calibration pipeline for a MWIR camera
- Researched and implemented convex optimization algorithms for high speed applications
- Implemented numerical methods for computer vision algorithms to run on FPGAs

SensHero Predictive Maintenance Solutions

Agu 2021 - Oct 2021

Data Science Internship

- Contributed to a project about fault detection in electric transmission lines
- Built models for condition monitoring and predictive maintenance

EXTRA-CURRICULAR

First Place in UORG 2023 [Target Tracking](#) (Image Processing and Control)

First Place in UORG 2022 [Autonomous UAV Computer Vision Category](#) (Image Processing)

Third Place in UORG 2022 [Autonomous UAV Autopilot Category](#) (Algorithm Development)

Second Place in [METU VTOL 2020 Sponsored by Boeing](#) (Image Processing and Design)

First Place in [International Robot Competition 2020](#) (Image Processing and Team Presenter)

11th Place in [Swarm UAV Competition - TEKNOFEST 2020](#) (Path Planning)

Google Solution Challenge 2021 (Mobile App Development with Flutter)

AdımODTÜ Undergraduate Research Grant Program in 2020-2022

[DTS2022 Course](#) as a part of [Design Factory Global Network](#) (Interdisciplinary Course in METU)

Deep Learning Study Group # 7 with Inzva (a Turkish Hacker Community)

Mentorship in the IEEE METU, Specifically Robotic and Automation Society (RAS) subdivision

TECHNICAL STRENGTHS

Computer Languages Python, C/C++, MATLAB, Dart

Software & Tools Pytorch, ROS, OpenCV, $\LaTeX$, Git, Flutter, Gazebo, Solidworks

CERTIFICATES

Machine Learning by Stanford Online

Credential ID: GY4VF4K9FVLJ

Neural Networks and Deep Learning by deeplearning.ai

Credential ID: 7WW5C7RY4N2Z
